

# HALO CARD PRINTER

## BIM029001

The next generation of direct-to-card printing, the Halo Card Printer from BadgePass, was specifically designed for the evolving ID and security industry.

The most secure card printer available, secure boot technology protects your system from malware or viruses on bootup and the Trusted Platform Module manages the printer's own certificates and keys. All data sent between the software and printer is encrypted, keeping your cards and data safe and secure throughout the badge issuance process.

From unboxing to issuing cards and managing the printer, The Halo is exceptionally user-friendly. The intuitive printer dashboard allows you to view printer status, cleaning status, firmware updates, and more! BadgePass Halo ribbons are easy to swap out and automatically recognized by the printer.

***\*Compatible with both BadgePass ONE Software and BadgePass Enterprise Software.***

### IDEAL FOR:

- Employee Badges
- Student IDs
- Healthcare and Patient Cards
- Event Passes
- Access Control
- and more
