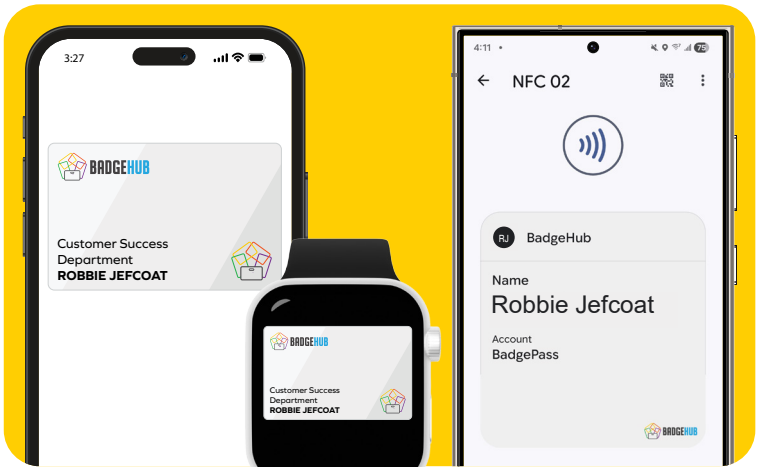
NFC WALLET CREDENTIALS

General Overview

One platform, 3 ways to carry your card.

BadgeHub has always given you the power to issue stunning physical ID cards and virtual badges through the BadgeHub GO app. Now we're adding a third arrow to the quiver — NFC Wallet Credentials, delivering secure digital IDs straight to Apple Wallet and Google Wallet so cardholders can tap in from their phone, no app required.



HOW IT WORKS:

1. Issue in BadgeHub

Admin issues a digital credential to a cardholder directly from BadgeHub — just like a physical badge.

2. Delivered Instantly

The cardholder receives a notification and adds the credential to Apple Wallet or Google Wallet with a single tap.

3. Tap & Go

The cardholder holds their phone near any compatible NFC reader to authenticate — fast, contactless, and secure.

4. Instant Revocation

Deactivate a credential in BadgeHub and it's removed from the cardholder's wallet immediately — no card to chase down.

YOUR COMPLETE CREDENTIAL ARSENAL:

All three managed from a single BadgeHub subscription - no extra software, no extra cost per cardholder.

Physical ID Cards

The Original

Print stunning, full-color physical badges directly from any device — phone, tablet, or PC — to a BadgeHub-connected card printer. The gold standard for identification, now with cloud-speed convenience.

BEST FOR:

- Daily ID wear
- Access Control
- Regulated environments

BadgeHub GO

Virtual Badge Application

Issue a virtual badge directly to the cardholder's BadgeHub GO app on iOS or Android. Cardholders can store and display badges from multiple organizations in one place — and deactivated badges disappear instantly from the app.

BEST FOR:

- Multi-org cardholders
- Remote workforces
- Rapid onboarding

NFC Wallet

Apple & Google Wallet

NEW

Push a secure NFC credential directly to Apple Wallet or Google Wallet. Cardholders tap any compatible reader with their phone to authenticate — no app to open, no card to carry. Lives natively on the device they already use every day.

BEST FOR:

- Door Access
- Card-free facilities
- Always-on convenience

EXPANDED SUPPORT - 3 NEW NFC CREDENTIAL TYPES: NEW

BadgeHub now supports three additional NFC credential types, all using the same lifecycle, billing, and reporting flows you already know.

HID SEOS Credentials

For HID Signos readers. Customers with existing HID infrastructure can now use mobile NFC credentials alongside or in place of physical cards.

NFC Day Pass Credentials

Temporary access for visitors, contractors, and event attendees, priced per credential per day with pool-based billing.

Custom Card Template Subscriptions

Issue NFC credentials using your own card templates, supporting customer-specific branding, layouts, and custom key encryption.

KEY FEATURES AND BENEFITS:

- ☑ **Contactless authentication via NFC** - Fast and hands-free access
- ☑ **Works with BadgePass Slimline Multi-Tech reader** - more reader offerings coming soon
- ☑ **Credential lives in the native wallet** - always accessible, even when BadgeHub isn't open
- ☑ **Automatic badge updates** - changes made in BadgeHub push instantly to the wallet credential
- ☑ **Multi-organization support** - cardholders can hold credentials from multiple BadgeHub facilities in one wallet
- ☑ **Instant revocation** - deactivated credentials are removed from the wallet in real time
- ☑ **Secure activation flow** - every credential is uniquely provisioned and encrypted end-to-end

APPLE WALLET (IOS):

- Works on iPhone and Apple Watch
- Express Mode — tap without unlocking your phone
- Stored securely in Apple's Secure Element chip
- Compatible with iOS 16 and above
- Works in Airplane Mode via NFC

GOOGLE WALLET (ANDROID):

- Works on Android phones and Wear OS devices
- Host Card Emulation (HCE) — no dedicated chip required
- Compatible with Android 8.0 (Oreo) and above
- Works on most Android NFC-enabled devices
- Credential visible on lock screen for quick access

IDEAL USE CASES BY VERTICAL MARKETS:

- K–12 & Higher Education
- Corporate & Enterprise
- Healthcare & Home Health
- Government Agencies
- Hospitality & Memberships
- Non-Profits
- Events & Temporary Access
- Multi-Location Organizations

SECURITY YOU CAN COUNT ON:

- ☑ **End-to-end encrypted provisioning** - credentials are never transmitted in plain text
- ☑ **Device-bound credentials** - a credential issued to a phone cannot be transferred to another device
- ☑ **Biometric unlock support -** Face ID, Touch ID, and Android biometrics add a second layer of authentication
- ☑ **Hosted on Microsoft Azure** - the same trusted cloud infrastructure as the rest of BadgeHub
- ☑ **Audit trail maintained -** all access events are logged in BadgeHub for reporting and compliance

WHAT YOU NEED TO GET STARTED:

- ☑ **Active BadgeHub subscription**
- ☑ **NFC-enabled reader hardware -** currently supported with the BadgePass Slimline Multi-Tech reader with more coming soon
- ☑ **iOS 16+ or Android 8.0+ -** on the cardholder's device
- ☑ **Apple or Google account -** for wallet provisioning on the cardholder's phone
- ☑ **NFC Wallet Credentials -** available at a per credential price
